A Concept and System of Digital Identities for proximity on-site service access

Modern Campus ID (Student ID / Staff ID) for universities in Europe & the world

Alexander Loechel - IT иновации във висшето образование 2025 – Varna, Bulgaria

The LMU Student ID (over time)

LMU Student ID till 2019

LMUcard Student ID 2019-2025

LMU Student ID 2025+

LMU Student ID 2027+ ?

today

eduTAP & eduTAP@LMU

LMUcard – LMU Student ID

The transition of LMU Student IDs from paper to plastic cards (LEGIC CTC4096-MM410)

→ A Project 2015 – 2019

Goal: A modern integrated, contactless card for all services at LMU ← Better User Experience

- ✓ Visual Student ID – contactless readable registration number
- ✓ Payment at mensa / canteens, cafeterias and vending-machines, copiers
- ✓ Library ID ✓ Public Transport Ticket (MVV Semesterticket)

It was a hard project with a lot of stakeholders

The European Student Card (ESC)

The **European Student Card** – a project to add a **European dimension** to local Student IDs

✓ Securely validate the student status

Idea by →
Jean-Paul Roumegas
(les Crouse)

European Student Card logo

Combines the European identity (text & flag) with the QR code. It facilitates the implementation and recognition of the ESCs

ESCN - European Student Card Number

Unique card identifier that serves to link a specific card to the specific higher education institution who produced it and to identify a card

ESI - European Student Identifier

Unique identifier that allows to link a given student to a specific ESC. It is not recommended to be printed on the card.

European Student Card

✓ A great vision

EUGLOH - The European University Alliance for Global Health

9 Universities, 1 Goal

Building Europe's Campus for Global Health

- Equipping students and staff with the skills needed to shape the future of global health
- Creating a **seamless, inclusive European campus** that enables **mobility**, joint learning opportunities, and **shared infrastructure**
- Addressing pressing health issues through interdisciplinary, co-created education, research and innovation that engages with social needs

15-20 % foreign students
40 % European citizens
60 % from other nations

LMUcard + European Student Card (ESC)

LMU as an international university

International Partners and the European University Alliance

Strategic partnerships

- LMU-Bordeaux Research Cooperation Program
- Cambridge LMU Strategic Partnership
- LMU-China Academic Network (LMU-ChAN)
- LMU-NYU Research Cooperation Program
- LMU-TAU Research Cooperation Program
- LMU-Todai Cooperation in the Sciences
- LMU-UCB Research in the Humanities

EU projects – The European University Alliances

European University Alliance for Global Health (EUGLOH)

Global collaborations

- LMU - China Scholarship Council (CSC) Program
- LMU-Harvard Young Scientists' Forum
- LMU's Latin America Network

International alliances

- League of European Research Universities (LERU)
- European University Association (EUA)
- Europaeum

Infinity partners → infinity stakeholders → infinity systems

A shared vision – seamless mobility

EUGLOH & the European Student Card have a **shared vision**

- ✓ Seamless mobility
- ✓ Easy service access

For:

- ✓ students,
- ✓ staff and
- ✓ professionals

EUGLOH ESC Working Group
formed end of 2020:

All EUGLOH universities should adopt ESC
and define services to share (Lead Paris-Saclay).

But differ in the audience and baseline
technical requirements

The European Student Card (2020)

Basic concepts

The European Student Card (ESC) is a new standard created by European Higher Education Institution (HEI) to promote student mobility within Europe (EHEA zone).

→ The long-term objective is to give all European Students the same rights as a local student when travelling abroad.

So, the idea is to create a card that can be accepted anywhere within Europe. This card gives access to an unlimited number of services that students use in their daily life, such as borrowing book from university library, accessing student cafeteria with discounted prices, accessing university premises, using public transportation etc.

Short- and long-term perspectives

The first basic service to be set up is **student status authentication**. This service offers the possibility for any organization (private business, public administration, association, HEI...) to confirm whether a card holder is a student or not. **This service is a necessity because student status authentication is usually a prerequisite to give access to other services that are restricted to students.**

- Other services will **become available afterward**, such as:
 - The possibility to use the card as an **electronic wallet** for day-to-day expenses
 - The possibility to write new information on the card after it has been delivered, granting access to a wide range of new services for the student
 - The possibility of using the card as a **key** to allow **exchange of data between HEIs**, to facilitate administrative procedures during student mobility
- **Dematerialisation of the card itself, using a smartphone**

Source: ESC Handbook for institution: Users's Guide to connect to the Platform
(<http://europeanstudentcard.eu/wp-content/uploads/2017/02/ESC-User-Guide-def.pdf>)

EUGLOH campus cards state and connected services

→ Vision:

All university members should be able to use services of host university while on visit → easy and contactless

Status of four core members (IT wise - 2020)

Ludwig-Maximilians-Universität München

- Legic CTC Cards (Legic Advant + Prime)
- Payment (Studierendenwerk München)
- Cloud-Printing and Scanning (Secure-Printing and Payment)
- Library
- Ticket for Public Transport System

Université Paris-Saclay

- NXP Mifare DESfire Cards
- Payment (izly – les Crous)
- Library
- Physical Access Control

Lunds universitet

- NXP Mifare Classic Cards
- Physical Access Control (online and offline)
- Login at copiers (for copy/print/scan)
- Library
- Several other services, but not any payment services

Universidade do Porto

- NXP Mifare Classic Cards / Java Cards with Mifare Classic emulation
- Library
- Physical Access Control
- Canteen & cafeterias
- Printing Service
- Attendance

All contactless, but
Not compatible technologies

EUGLOH & ESC – a shared vision and ambitions

We have a shared vision: **seamless mobility & easy service access**

But an ESC QR-Code was no option for us (GDPR & IT-Security wise), the long-term perspective a digital smartphone pass looked fascinating

→ a great vision

EUGLOH **wanted to share their services** across the alliance, and beyond (as we all have more partners)

The IT-Persons from LMU, U.Porto and Lund already knew each other → we met at ECCA 2019

- ✓ **understand the technological possibilities,**
- ✓ **knew and understand the topics, have access to major technology providers**
- ✓ **but also, the capabilities of the ESC Project team**

→ *If we want a good and interoperable solution in the near future, we must come up with a working proposal*

→ *That meets our requirements and audience (students, staff and professionals)*

DRY: do not re-invent the wheel

A complex system that works is invariably found to have evolved from a simple system that worked. The inverse proposition also appears to be true:

A **complex system designed from scratch never works and cannot be made to work**. You have to start over, beginning with a working simple system.

Source: "John Gall's law" - from "Systemantics: How Systems Really Work and How They Fail" - 1975

→ Digitalization Projects are complex enough, don't try to build everything from scratch

If I have seen further it is by standing on the shoulders of Giants.

Source: "Sir Isaac Newton letter to Robert Hooke dated 5 February 1675"

Success factors – Understand the complexity

→ Complexity management and possibilities to act – Stacey Matrix & Cynefin-Framework

How to KISS: Keep it Simple, Stupid

Key to all Services → Identification / Authentication

- Triple-A-System
 - (Identification)
 - **Authentication**
 - **Authorization**
 - **Accounting**
- **On-site services access** is about proving your entitlements and identity
- “*something you know*” as an authentication method for on-site service access is not very **efficient**, best a combination of “*something we have*” + “*something we are*” → Smartphone Wallet passes + authentication via biometrics
- We already have a powerful IDM System for **online-services** → Shibboleth → eduGAIN-AAI

Authentication Factors

- It is all about User Experience

Campus Cards are about Accessing Services

Identification

- **Identification**
- **Status verification**
- **Proof of entitlement**
- Single Sign On / 2FA / FIDO2
- Attendance check
 - Check-in for exams
 - attendance at courses
 - Time recording
- Electronic Signature (of legal documents)

Electronic payment / cashless campus

- Canteen & cafeterias
- Vending machines
- Printing / scanning (secure & follow me printing)
- Ticketing (events and conferences)

Physical Access Control

- Areas (campus, parking lot)
- Buildings
- Rooms
 - Classrooms
 - Labs
 - Computer rooms
 - Learning spaces
 - Offices
 - Accommodation facilities (i.e., dorms)
- Athletic facilities

Library services

- Access to / borrow
 - Physical media (book, audio and video media)
 - E-media (book, audio and video media)
- Learning spaces

Transport

- On campus services (university shuttle service)
- Public transport tickets & discounts

Discount and promotions

- **Discounts** on cultural activities
 - Museums
 - theaters
 - cinemas
- Shops
- Restaurants

On- & Off-Campus → On-Site Usage / Proximity Use-Cases
+ Online Services

providing service → create benefits

Campus Cards from a User Experience Point of View

Campus Cards (Student IDs / Staff IDs / Affiliate IDs) function as:

- **Official (visual) Identity Documents** and for university branding
- Primary medium for **Service Access** on-site → **proximity use-cases**
- Service Domains:
 - On-Campus
 - **Identification** and attendance tracking (courses, internships, exams)
 - **Payment** (open loop or closed loop payment) and discounts eligibility
 - **Physical Access Control** (buildings, labs, dorms)
 - **Library Services**
 - on-campus & public **Transport** integration (regional semester ticket models)
 - Off-Campus (Museums, theaters, shops, restaurants, ...)
 - **Status-based Identification** for third-party services
 - **Eligibility Verification** (e.g., student status, age-based discounts)

Campus Cards are about Accessing Services

The Service Domains

- Payment / Cashless Campus,
- Physical Access Control ,
- Library services,
- Transport

are “**local**” services, which only needs to be solved on a local level

- ✓ Separate service passes can choose best fitting technology
- ✓ Services are provided to **ALL** persons (not only one role, e.g., students)

→ Student IDs / Staff IDs are **legally limited** to enrolled / employed members of a Higher Education Institution (HEI)

→ Dedicated service passes can be legally issued to not enrolled / employed persons ← Users of the service

Educational role system (from eduPerson)

Trust level / Assurance Level

- Very important for **IDENTIFICATION & AUTHENTICATION**
- Quality of identity (personal) data
- Type of authentication & consequences for identification medium

no trust

normal

Authentication:
 • username / email
 + password
 Identity proofing:
 → self-asserted
 → verified e-mail
 address

substantial /
medium

Authentication
 • certificate based
 • FIDO2
 • Smart ID
 Identity proofing:
 → officially confirmed
 → manual check of a
 government issued
 photo-ID

high

Authentication
 • **eID.AS** compliant
 → eID of EU Citizen IDs
 → provided by HEI for
 foreign Students
 Identity proofing:
 → officially confirmed
 → Identity document automated and
 technically checked to be genuine
 and represent the claimed identity

Think outside the card: Medium → Services

Campus Cards are about Accessing Services

Almost all services are **SHARED** services

- ✓ University library ← Can be used by members of all universities in town / metropol area, in a university alliance or are open to the public
- ✓ Transport (semester ticket) ← Are just discounted and time limited public transport tickets (valid for 6 month)
- ✓ Canteens, cafés and vending machines on campus ← Can be used by all roles and members of all universities
- ✓ Physical Access Control (PAC) ← For all roles in a university / university alliance

Services are provided by **different Service Providers** (European universities are not business focused)

- ✓ Canteens, cafes and vending machines are operated by Student Affairs Unions
- ✓ Transport services are operated by local transport companies
- ✓ University Buildings (PAC) are university or state owned

→ Each **Service Provider** can issue their **own pass**, matching their needs and security requirements

Munich campus as an Example of SHARED Services

Most European Universities do not have a clearly demarcated campus area. They are just in the city.

The university is not even the main service provider for student life.

Typical Service-Providers:

-  (=Student Affair Union)
 - Canteen & cafeterias
 - Vending machines
 - Student housing / dorms
 → Responsible for all universities in Munich (LMU, TUM, HM, ...)
- Libraries are dedicated (almost independent) units at LMU we have two libraries: University Library and
   Bayerische StaatsBibliothek
 Information in erster Linie
 Bavarian State Library
- Transport → Public Transport System

European University Alliance for Global Health

eduTAP

<https://eduTAP.eu>

*Modern Campus ID (Student ID / Staff ID)
for universities in Europe & the world*

Concept of eduTAP

Apple / Google Wallet – Focus on User Experience

Campus Cards from a User Experience Point of View

User preferences for **Physical Wallets**:

- ✓ Less cards are better
- ✓ **Contactless** cards are better

Example LMU 2015 – Transition from multiple cards into **ONE** integrated Campus Card

Campus Cards from a User Experience Point of View

User preferences for Smartphone Wallets:

- ✓ NFC / Contactless passes are better than scanning visual codes
- ✓ **One pass per service** is better
 - User control over which services to use
 - Auto-Presentation of pass needed
 - Clear contextual communication (additional information on pass specific for the service, specific branding of service)

Digitizing cards **vs.** Leveraging the possibilities of smart devices → Stages of Digitalization – Period of Digital transformation

Digitalization 1.0

- Digitization – create digital versions of analog documents

→ Digitization vs. Digitalization (machine readable content / payload)

Digitalization 2.0

- Digitalization with internal focus
- Optimize internal administrative processes – **organization centric optimizations**
- Processing of data

→ Digital transformation (a hard shift)

Digitalization 3.0

- Digitalization with focus on the user – **user centric optimizations**
- Optimization on how services are discovered and seamlessly used
- Flow of data

→ Service-oriented
→ **Digital identity**
→ Interoperability

→ User Experience

eduTAP – educational tapping

tap to ...

- ✓ identify yourself,
- ✓ verify your status,
- ✓ proof your entitlement,
- ✓ claim a discount,

tap to access a service on-site directly:

- ✓ tap to pay (open and close loop-payments),
- ✓ tap to open a door,
- ✓ tap to lend a book,
- ✓ tap to take a campus shuttle.

TAP TO PAY

no app, just tap!

<https://eduTAP.eu>

eduTAP – educational tapping – What is eduTAP?

- eduTAP the concept
 - Splitting integrated campus cards into **dedicated service passes** and a **harmonized identity pass**
 - Leveraging the full potential of digital wallets
 - **Use existing**, secure and proven contactless **standards** – do not invent new standards

→ Focus on **User Experience** and **interoperability**

- eduTAP the software – to enable HEIs and Service Providers to:
 - create, issue, and manage passes within the smart device wallet
 - interact with wallet passes to give access to services, identify, and verify the status of students and staff members

→ eduTAP helps to fulfill the
great vision of the European Student Card
and **enables interoperability** and a **better user experience**

Services and Service Consumers

- ✓ It is all about **providing services** → **eduTAP is for anyone**
 - ✓ For users of the (home or host) institution
 - ✓ User incoming for a short-term or long-term mobility
- ✓ Staff / faculty members are more likely on short-term mobility than students
→ **leading by example**

ISCED:2011 Level

Level	Label
0	Early childhood education
1	Primary education
2	Lower secondary education
3	Upper secondary education
4	Post-secondary non-tertiary education
5	Short-cycle tertiary education
6	Bachelor's or equivalent
7	Master's or equivalent
8	Doctorate or equivalent
x	Faculty or Staff member of HEI

UNESCO ISCED:2011:
International Standard Classification of Education

eduTAP – educational tapping – for the users

eduTAP passes enable using smart devices to perform transactions with a

simple tap

making everyday interactions **easier** and more secure both on campus and beyond.

→ User Experience

Our mission is to provide an **interoperable solution** that works for everyone

- for users of the (home or visiting) institution
- for user incoming for a short-term or long-term mobility
- staff / faculty members are more likely to be on short-term mobility than students

Technical details and features of Wallets / Passes

The wallet is a **container for multiple passes**

Technical features:

- **Auto-Presentment / Smart Select** ← reader selects the specific pass to interact with (if available)
- Selectable Authentication requirements ← **security features**
- Express-mode (Apple)
- **Battery reserve** (pass is still usable if phone has powered off; important for keys, transit tickets, payment)
- Groupable
- Validity dates
- Remote updateable / revokable
- **Offline usable** (→ non traceable)
- *Host Card Emulation possible*

Technical details and features of Wallets / Passes

Auto-Presentment / Smart Select of an NFC enabled Pass in the Wallet

Technical details and features of Wallets / Passes

Battery Reserve Mode – Use the Wallet even if it's powered of

- for Keys (Dorm-Rooms, Class-Rooms, Building Access, Cars)
- for Payment
- for Transport Tickets

Up to 7 Days after shutdown of the smartphone

Technical details and features of Wallets / Passes

- ✓ Technical details and features of wallets / passes → Path to an **interoperable** campus card
- ✓ If each pass (technology) can be individually selected and leveraged, and the pass in the wallet can be selected by the reader (**Smart Select / Auto-Presentment**)

→ **One pass per service**

Technical details and features of Wallets / Passes

- For contact less communication is NFC the protocol
- Communication via ISO 14443
- Data Formats (File System access)
 - Google Smart Tap
 - Apple VAS (Value Added Services)
 - NFC ECP 2.0 (Enhanced Contactless Polling)
 - Host Card Emulation (HCE: of proprietary Protocols)
 - Mifare DESfire (via Mifare2GO / NXP secure element)
 - Legic NEON / Advant (via Legic Connect)
 - HID Seos
 - Internal the Secure Module acts as a JCOP smart card
- ISO 18013-5 Personal Identification
 - NFC handover to BLE or WiFi
 - Core functionality in Android and iOS OS API*

www.eugloh.eu

eduTAP and the current Apple / Google Student IDs

How about the native, current **Student IDs** in Apple Wallet & Google Wallet (Mifare or HID based)?

- ✓ Fantastic integrated cards (**one card** for all services, perfect for **corporate**)
- ✓ *Should be used for all university services* (Apple's intention)
 - University / organisation-centric optimization
 - Does not support the “seamless mobility” requirement
 - Shared services, how about other users than own students?
 - **LESS secure** (if following the ESC data zone approach)
 - Not the required User Experience, and does not meet the legal requirements

This is a **dead-end solution**, it will not help or bring benefit, it actually provides a **WORSE User Experience**

It does NOT support **Selective Disclosure** and **Zero Knowledge Proof**

Apple and Google is aware of this and working on it!

Apple and Google Access Platform are good for PAC and Payment passes

- **NOT for Student or Staff IDs**
- **GOOD dedicated service passes**

Wallet Passes are about a great User Experience

A **great User Experience** is key to adoption and usage

- ✓ Non-NFC Passes are **NO GOOD** User Experience
- ✓ Unnecessary passes should be avoided ← NO dedicated pass for simple eligibility verification (status, institution affiliation)

transition

- ✓ Verifiable Credentials
- ✓ Selective Disclosure
- ✓ Zero Knowledge Proofs

Think outside the card: Medium → Services

Service Domains: Identity and Discount

From a legal point of view, Identity Documents of public universities are **official state photo IDs**

- ✓ Legal requirements
 - ✓ Security considerations
 - ✓ High assurance level
- **International standards** for HEI Identities → eduGAIN (incl. eduPerson, SCHAC)
 e.g. European Student Identifier → routable information for course participation at other institutions (during mobility programmes)

Identity Documents (Student ID, Staff ID and Affiliate IDs) are used

On-Site (proximity use-cases)

Online

On-Campus

Off-Campus

- ✓ Attendance at courses
- ✓ Check-in for exams
- ✓ Time recording
- ✓ Discounts in canteen & cafeterias
- ✓ Identification for university authorities (Student legal office and examination offices, campus security)

- ✓ Identification for public authorities (e.g., police)
- ✓ Identification for third party (e.g., checkin at hostels)
- ✓ Eligibility verification for discounts and access (e.g., role-based, age-based, institution related)

- ✓ As authentication factor

A question of scale: Student IDs

European Union

- ~ 5,000 Higher Education Institutions (HEIs)
- ~ 18,800,000+ tertiary students (2022)

Erasmus+ Countries

- Includes EU + Iceland, Liechtenstein, Norway, North Macedonia, Serbia, Turkey
- Significantly expands the European higher education landscape → ~ 20,000,000+ tertiary students

Worldwide

- ~ 18,000 recognized HEIs across 180+ countries
- ~ 200,000,000+ tertiary students globally

→ Organized in
National Research and Education Networks (NRENs)

→ It should work everywhere: seamless mobility & easy service access
→ a GLOBAL Student ID ←

GÉANT – The IT provider for Higher Education in Europe

The GÉANT Association is the collaboration of European National Research and Education Networks (NRENs)

- Non-Profit Organization
- Service-Provider for IT / e-Infrastructure services for the European Higher Education Sector
- Pan European – Non EU members
- Key Services:

- **GÉANT Trust & Identity Services**

- GÉANT Network and Connectivity Services
- GÉANT Security Services
- GÉANT Cloud Services
- Procurement Agency for EU-HEIs

→ eduTAP is a perfect fit for GÉANT Trust & Identity Services

Identity Pass: Reuse Shibboleth / eduGAIN data schema: The common authentication method in the educational sector

- ✓ Shibboleth – local or in federation (national or multi-national) → eduGAIN-AAI → SAML2 or OIDC

Verifiable Credential for HEIs (Prototypes)

European Student Card as Verifiable Credential

DC4EU non-foundational Ids

Table with available schemes for non-foundational IDs

Scope	Data model name	Brief explanation	Status/ Detailed explanation	Schema URL	Registry URL
Non-foundational identity	EducationalID	Identifies the natural person in the context of an educational organisation, including national extensions	Available	Schema	Verifiable Data Registry

Digital Identity in the Wallet

Common Verifiable Credential Formats / Protocols for Digital Identities

- SD JWT (EU)
- ISO/IEC 18013-5 (mDL)
- W3C Verifiable Credential Data Model

Issuing and Redemption Protocols

- OID4VC (OID4VCI and OID4VP)
- ISO/IEC 18013-5

For **proximity** use-cases NFC / BLE transmission is crucial

→ Our choice ISO/IEC 18013-5 (mDL) for Wallet credentials
JWT

Image Source: <https://www.linkedin.com/feed/update/urn:li:activity:7333379048112361472/>

A Common Identity Pass using the ISO/IEC 18013-5 model

- The “ISO/IEC 18013-5 Personal Identification” model is designed to support
 - A protocol for two devices to establish a **secure wireless communication** channel and exchange structured request and response message
 - **Identification** of the credential holder (**user binding**)
 - **Selective release of data elements** by the credential holder (**data minimization / consent**)
 - **Pre-consent** mechanism for frequently repeated processes (e.g., discount payment at Student Affairs Unions)
 - A protocol to retrieve credential data directly from the mobile device of the holder, **purely offline**, facilitating **availability** and **non-traceability**
 - An **optional** protocol to **retrieve additional data** from the issuing authority
 - A mechanism to establish **integrity** and **authenticity** of the credential data
 - A mechanism to confirm **device binding** (signing at transaction time)
 - Multi-document and **multi namespace aware** ← extendable for other use cases
- **Established governmental credential format that is already in use** ← **Following the ARF of EUDI-Wallet**
→ mobile driving licence / eu.europa.ec.eudiw.pid.1 (prototype of national eIDs in Europa)
- **Already supported** by the OEM-Smartphone-Manufactures (Apple and Google)
→ see: <https://android-developers.googleblog.com/2020/11/privacy-preserving-features-in-mobile.html>

**EU Digital
Identity Wallet**

Identity Pass: ISO/IEC 18013-5 Data model

Reuse of directory data (common eduGAIN attributes) 

- portrait (photo, *mandatory for identification documents*)
- givenNames
- sn (surname)
- email
- eduPersonAffiliation / eduPersonScopedAffiliation
- eduPersonEntitlement

Campus Cards – Point of Views

Technology Experts vs. Consumers (Students, staff and professionals)

The Technology and issuing processes are not important to the consumers (card / pass holders)

The IDs and service passes should:

- ✓ **just work**
- ✓ be immediately available when needed
- ✓ be secure & GDPR compliant
- ✓ trustworthy
- ✓ **accepted everywhere**
- ✓ *be boring – no need for attention*

Students, teachers and researches should be able to focus on the important things,

→ their studies and research

→ enjoy student mobility (and do not need to wait weeks for a physical campus card)

“Boring” is a good thing

Every company gets about three innovation tokens.

Source: Dan McKinley, "Choose Boring Technology"

<http://mcfunley.com/choose-boring-technology>

“Boring” let you get things done

Same is true for people, if you **need to think** to get something done it costs effort, and energy for other more important things

Don't make me Think

→ User Experience is important

You should **NOT** need to care about “boring” and “un-important” stuff

You should be able to **focus on the important** things
(studying, learning, researching, ...)

ECCA Conference 2025 LMU Munich, Germany

Mikhail Strunkin • 1.
Global Physical Access Partnerships for Google Wallet at Google
1 Monat • Bearbeitet

That time of year again - when tech vendors and universities gather under the roof of **ECCA - European Campus Card Association** to tackle the never-ending puzzle of digitizing the European Student Card.

This year, it feels like **Alexander Loechel** might just be the one to finally crack the code!

Let's see if 2025 is finally the year we go fully digital at **Ludwig-Maximilians-Universität München** and other **EUGLOH** members.

I have some confidence, finally :)

eduTAP – educational tapping

tap to ...

- ✓ identify yourself,
- ✓ verify your status,
- ✓ proof your entitlement,
- ✓ claim a discount,

tap to access a service on-site directly:

- ✓ tap to pay (open and close loop-payments),
- ✓ tap to open a door,
- ✓ tap to lend a book,
- ✓ tap to take a campus shuttle.

TAP TO PAY

no app, just tap!

<https://eduTAP.eu>

eduTAP – educational tapping – What is eduTAP?

- eduTAP the concept
 - Splitting integrated campus cards into **dedicated service passes** and a **harmonized identity pass**
 - Leveraging the full potential of digital wallets
 - **Use existing**, secure and proven contactless **standards** – do not invent new standards

→ Focus on **User Experience** and **interoperability**

- eduTAP the software – to enable HEIs and Service Providers to:
 - create, issue, and manage passes within the smart device wallet
 - interact with wallet passes to give access to services, identify, and verify the status of students and staff members

→ eduTAP helps to fulfill the
great vision of the European Student Card
and **enables interoperability** and a **better user experience**

We'd love to hear from you!
